Clearing Extent

ATTACHMENT 1 - ROL 6.1 Clearing Extent

Notes:
 This plan was prepared as a desktop assessment tool. The information on this plan is not suitable for any other purpose. Property dimensions, areas, numbers of lots and contours and other physical features shown have been compiled from existing information and may not have been verified by field survey. These may need verification if the development application is approved and development proceeds, and may change when a full survey is undertaken or in order to comply with development approval conditions. No reliance should be placed on the information on this plan for detailed design or for any financial dealings involving the land. Saunders Havill Group therefore disclaims any liability for any loss or damage whatsoever or howsoever incurred, arising from any party using or relying upon this plan for any purpose other than as a document prepared for the sole purpose of accompanying a development application and which may be subject to alteration beyond the control of the Saunders Havill Group. Unless a development approval states otherwise, this is not an approved plan.

Environmental Pre-Start Checklist

Attachment 2

EPBC Approval (EPBC2016/7817) and Stages

APPROVAL

Mirvac Greater Flagstone Project, Greenbank, Queensland (EPBC 2016/7817)

This decision is made under sections 130(1) and 133(1) of the *Environment Protection and Biodiversity Conservation Act 1999 (Cth)*. Note that section 134(1A) of the **EPBC Act** applies to this approval, which provides in general terms that if the approval holder authorises another person to undertake any part of the action, the approval holder must take all reasonable steps to ensure that the other person is informed of any conditions attached to this approval, and that the other person complies with any such condition.

Details

Person to whom the approval is granted (approval holder)	Mirvac Queensland Pty Limited
ACN of approval holder	060 411 207
Action	Development of a master planned residential community, on Lot 1 on SP297192 (formerly Lot 205 on RP845844, Lot 434 on RP845844 (part) and Lot 9 on S312355), within the Greater Flagstone Priority Development Area, Greenbank, Queensland.

Approval decision

My decision on whether or not to approve the taking of the action for the purposes of the controlling provision for the action is as follows.

Controlling Provisions

Listed Threatened Species and Communities	
Section 18	Approve
Section 18A	Approve

Period for which the approval has effect

This approval has effect until 31 July 2040.

Decision-maker

Name and position Nathan Hanna
Acting Assistant Secretary, Assessments and Governance Branch
Department of the Environment and Energy

Signature

Date of decision

11/10/2019

Conditions of approval

This approval is subject to the conditions under the EPBC Act as set out in ANNEXURE A.

ANNEXURE A – CONDITIONS OF APPROVAL

Part A – Conditions specific to the action

1. The approval holder must ensure that no **clearing of Koala or Grey-headed Flying-fox habitat** for **stage 1** occurs outside the **stage 1 site**.
2. The approval holder must ensure that no **clearing of Koala or Grey-headed Flying-fox habitat** for **stage 2** occurs outside the **stage 2 site**.
3. For the protection of the **Koala and Grey-headed Flying-fox habitat**, the approval holder must implement the **Natural Environment Site Strategy** to avoid **degradation** of the **on-site conservation area** as a result of the action, until such time that **Logan City Council** has accepted management of the **on-site conservation area** in writing, and the approval holder has provided evidence of this to the **Department**.
4. Within three (3) months of the **commencement** of **stage 1** of the action, the approval holder must submit, for approval by the **Minister**, an Offset Strategy to compensate for the loss of 230 ha of **Koala and Grey-headed Flying-fox habitat**. The approval holder must not **commence stage 2** of the action until the Offset Strategy has been approved by the **Minister** in writing. The approved Offset Strategy must be implemented. The approved Offset Strategy must:
 - a. be prepared by a **suitably qualified person**
 - b. be prepared in accordance with relevant approved **conservation advices, recovery plans and threat abatement plans**
 - c. demonstrate that the proposed offset area(s) meets the principles of the **EPBC Act Environmental Offsets Policy and Environmental Management Plan Guidelines**
 - d. include timelines and mechanisms for **legally securing** the offset area(s)
 - e. provide a written description and map that clearly defines the location and boundaries of the proposed offset area(s) for **Koala and Grey-headed Flying-fox habitat** (must be accompanied by the **offset attributes and shapefiles**)
 - f. demonstrate that there is a real potential for **Koala and Grey-headed Flying-fox** to utilise the offset area(s), including through (but not limited to):
 - i. **habitat** suitability
 - ii. connectivity with other **habitats** including **biodiversity corridors** that contain **Koala**
 - iii. proximity to known **Grey-headed Flying-fox** camps.
 - g. describe relevant baseline information regarding the offset area(s), based on surveys undertaken (prior to offset management commencing), including (but not limited to) quantification of the existing extent and quality of **habitat** for the **Koala and Grey-headed Flying-fox** present within the offset area(s) (the baseline condition)
 - h. include time bound commitments to ecological outcomes and offset performance and completion criteria (including milestones) for achieving ecological outcomes for the **Koala and Grey-headed Flying-fox**
 - i. detail the management actions and regeneration and revegetation strategies to be undertaken at the offset area(s) to achieve the ecological outcomes and offset performance and completion criteria, including:
 - i. the timing and frequency of these measures, and person(s) responsible
 - ii. a program to monitor and report on the effectiveness of these measures, including monitoring and reporting progress against the ecological outcomes and offset performance and completion criteria at an appropriate time and frequency

- iii. criteria for triggering adaptive management actions, contingency measures and corrective actions if the ecological outcomes and offset performance and completion criteria are not achieved, and the timing and frequency and person(s) responsible
 - iv. details of the potential risks to the successful implementation of the plan and measures that will be implemented to mitigate against these risks, and
 - v. the person(s) responsible for monitoring, reviewing and implementing the Offset Management Plan.
5. For the protection of the **Koala**, the approval holder must ensure that any offset area(s) will provide and/or establish a robust and diverse ecosystem that:
- a. contains **habitat** that provides both shelter and food resources relevant to the **Koala**, and
 - b. has a real potential to promote **Koala** breeding.
6. The approval holder must ensure that the revegetation of **Koala food trees** at the offset area(s) will utilise seeds collected from **Koala food trees** found within the offset area(s), or directly adjacent to the offset area(s), and preferably that also have evidence of **Koala** utilising them for feeding.

Part B – Standard administrative conditions

Notification of date of commencement of the action

7. The approval holder must notify the **Department** in writing of the date of **commencement of stage 1** and **stage 2** of the action, within **10 business days** after the date of **commencement of stage 1** and **stage 2** of the action.
8. If the **commencement of stage 1** or **stage 2** does not occur within two (2) years from the date of this approval, then the approval holder must not **commence the action** without the prior written agreement of the **Minister**.

Compliance records

9. The approval holder must maintain accurate and complete **compliance records**.
10. If the **Department** makes a request in writing, the approval holder must provide electronic copies of **compliance records** to the **Department** within the timeframe specified in the request.

Note: **Compliance records** may be subject to audit by the **Department** or an independent auditor in accordance with section 458 of the **EPBC Act**, and or used to verify compliance with the conditions. Summaries of the result of an audit may be published on the **Department's** website or through the general media.

Preparation and publication of plans

11. The approval holder must:
 - a. submit **plans** electronically to the **Department** for approval by the **Minister**;
 - b. publish each **plan** on the **website** within **20 business days** of the date the **plan** is approved by the **Minister** or of the date a revised action management plan is submitted to the **Minister** or the **Department**, unless otherwise agreed to in writing by the **Minister**;
 - c. exclude or redact **sensitive ecological data** from **plans** published on the **website** or provided to a member of the public; and
 - d. keep **plans** published on the **website** until the end date of this approval.
12. The approval holder must ensure that any **monitoring data** (including **sensitive ecological data**), surveys, maps, and other spatial and metadata required under a **plan**, is prepared in accordance with the **Department's Guidelines for biological survey and mapped data (2018)** and submitted electronically to the **Department** in accordance with the requirements of the **plan**.

Annual compliance reporting

13. The approval holder must prepare a **compliance report** for each 12 month period following the date of **commencement of the action**, or otherwise in accordance with an annual date that has been agreed to in writing by the **Minister**. The approval holder must:
- publish each **compliance report** on the **website** within 60 **business days** following the relevant 12 month period;
 - notify the **Department** by email that a **compliance report** has been published on the **website** and provide the weblink for the **compliance report** within five **business days** of the date of publication;
 - keep all **compliance reports** publicly available on the **website** until this approval expires;
 - exclude or redact **sensitive ecological data** from **compliance reports** published on the **website**; and
 - where any **sensitive ecological data** has been excluded from the version published, submit the full **compliance report** to the **Department** within 5 **business days** of publication.

Note: Compliance reports may be published on the **Department's** website.

Reporting non-compliance

14. The approval holder must notify the **Department** in writing of any: **incident**; non-compliance with the conditions; or non-compliance with the commitments made in **plans**. The notification must be given as soon as practicable, and no later than two **business days** after becoming aware of the **incident** or non-compliance. The notification must specify:
- any condition which is or may be in breach;
 - a short description of the **incident** and/or non-compliance; and
 - the location (including co-ordinates), date, and time of the **incident** and/or non-compliance. In the event the exact information cannot be provided, provide the best information available.
15. The approval holder must provide to the **Department** the details of any **incident** or non-compliance with the conditions or commitments made in **plans** as soon as practicable and no later than 10 **business days** after becoming aware of the **incident** or non-compliance, specifying:
- any corrective action or investigation which the approval holder has already taken or intends to take in the immediate future;
 - the potential impacts of the **incident** or non-compliance; and
 - the method and timing of any remedial action that will be undertaken by the approval holder.

Independent audit

16. The approval holder must ensure that **independent audits** of compliance with the conditions are conducted every five (5) years following the date of the **commencement of the action**, or as otherwise requested in writing by the **Minister**.
17. For each **independent audit**, the approval holder must:
- provide the name and qualifications of the independent auditor and the draft audit criteria to the **Department**;
 - only commence the **independent audit** once the audit criteria have been approved in writing by the **Department**; and
 - submit an audit report to the **Department** within the timeframe specified in the approved audit criteria.

18. The approval holder must publish the audit report on the **website** within 10 **business days** of receiving the **Department's** approval of the audit report and keep the audit report published on the **website** until the end date of this approval.

Completion of the action

19. Within 30 days after the **completion of the action**, the approval holder must notify the **Department** in writing and provide **completion data**.

Part C - Definitions

In these conditions, except where contrary intention is expressed, the following definitions are used:

Biodiversity corridor means areas of vegetation that allow **protected matter(s)** to travel from one area of **habitat** to another.

Business day means a day that is not a Saturday, a Sunday or a public holiday in the state or territory of the action.

Clear/Clearing/Clearance means the cutting down, felling, thinning, logging, removing, killing, destroying, poisoning, ringbarking, uprooting or burning of vegetation (but not including weeds – see the *Australian weeds strategy 2017 to 2027* for further guidance).

Commencement/Commence/Commenced means the first instance of any specified activity associated with **stage 1** of the action, including **clearing** of vegetation and **construction** of any infrastructure. **Commencement/Commence /Commenced** does not include minor physical disturbance necessary to:

- i. undertake pre-clearance surveys or monitoring programs;
- ii. install signage and /or temporary fencing to prevent unapproved use of the project area;
- iii. protect environmental and property assets from fire, weeds and pests; and
- iv. install temporary site facilities for persons undertaking pre-commencement activities so long as these are located where they have no impact on the **protected matters**.

Completion data means an environmental report and spatial data clearly detailing how the conditions of this approval have been met, including (but not limited to) information detailing the date, location, approved **impact site** (including **stage 1** and **stage 2**), actual total area of **habitat** (including type and quality) for **Koala** and **Grey-headed Flying-fox** that was **cleared** within the **impact site** (including within both **stage 1** and **stage 2**), and actual total area of **habitat** (including type and quality) for **Koala** and **Grey-headed Flying-fox** within the **offset area(s)**. The **Department's** preferred spatial data format is **shapefile**.

Completion of the action means all specified activities associated with the action have permanently ceased.

Compliance records means all documentation or other material in whatever form required to demonstrate compliance with the conditions of approval in the approval holder's possession or that are within the approval holder's power to obtain lawfully.

Compliance reports means written reports:

- i. providing accurate and complete details of compliance, **incidents**, and non-compliance with the conditions and the **plans**;
- ii. consistent with the **Department's Annual Compliance Report Guidelines (2014)**;
- iii. include a **shapefile** of any clearance of any **protected matters**, or their **habitat**, undertaken within the relevant 12 month period; and

- iv. annexing a schedule of all **plans** prepared and in existence in relation to the conditions during the relevant 12 month period.

Conservation advices means a conservation advice approved by the **Minister** under the **EPBC Act**.

Construction means the erection of a building or structure that is or is to be fixed to the ground and wholly or partially fabricated on-site; the alteration, maintenance, repair or demolition of any building or structure; preliminary site preparation work which involves breaking of the ground (including pile driving); the laying of pipes and other prefabricated materials in the ground, and any associated excavation work; but excluding the installation of temporary fences and signage.

Degradation means any deterioration of the extent or quality of **habitat**, including from (but not limited to): **clearing**, weed introduction or increase, dumping, domestic and feral animals, startling noises, vehicle entry, erosion, pollution and altered water flow.

Department means the Australian Government agency responsible for administering the **EPBC Act**.

Environmental Management Plan Guidelines means the Department's *Environmental Management Plan Guidelines (2014)*.

EPBC Act means the *Environment Protection and Biodiversity Conservation Act 1999 (Cth)*.

EPBC Act Environmental Offsets Policy means the *Environment Protection and Biodiversity Conservation Act 1999 Environmental Offsets Policy (October 2012)*.

Grey-headed Flying-fox means the Grey-headed Flying-fox (*Pteropus poliocephalus*) listed as a threatened species under the **EPBC Act**.

Habitat means the natural environment in which the relevant **protected matter(s)** has been identified to occur or is suitable for the **protected matter** to occur in, based upon field surveys and guidance contained in the relevant species or ecological communities' *listing advice*, **conservation advice**, **recovery plan** or *SPRAT profile*.

Impact site means the area designated as 'Impact Site' bounded by the solid red line on the map at [Appendix A](#).

Incident means any event which has the potential to, or does, impact on one or more **protected matter(s)**.

Independent audit means an audit conducted by an independent and **suitably qualified person** as detailed in the *Environment Protection and Biodiversity Conservation Act 1999 Independent Audit and Audit Report Guidelines (2015)*.

Koala means the Koala (combined populations of Queensland, New South Wales and the Australian Capital Territory) (*Phascolarctos cinereus* (combined populations of Qld, NSW and the ACT) listed as a threatened species under the **EPBC Act**.

Koala food tree(s) means a species of tree of genus *Angophora*, *Corymbia*, *Eucalyptus*, *Lophostemon* or *Melaleuca*, with a height of more than 4 metres or with a trunk circumference more than 31.5 centimetres at 1.3 metres above the ground, the leaves of which are known to be consumed by the **Koala**.

Legally securing means protect for conservation under a voluntary declaration under the *Vegetation Management Act 1999 (Qld)* or as a nature refuge under the *Nature Conservation Act 1992 (Qld)* or another enduring protection mechanism agreed to in writing by the **Department**.

Logan City Council means '*Logan City Council*', the local government authority for the city of Logan in Queensland, Australia.

Monitoring data means the data required to be recorded under the conditions of this approval.

Minister means the Australian Government Minister administering the **EPBC Act** including any delegate thereof.

Natural Environment Site Strategy means the document with the title *Mirvac Greater Flagstone Project: Natural Environment Site Strategy (18 April 2017)*, as approved by Economic Development Queensland on 2 June 2017.

Offset attributes means an '.xls' file capturing relevant attributes of the offset site, including the EPBC reference ID number, the physical address of the offset site, coordinates of the boundary points in decimal degrees, the **protected matters** that the offset compensates for, and any additional **protected matters** that are benefiting from the offset, and the size of the offset in hectares.

On-site conservation area means the area designated as 'On-site Conservation Area' and shaded dark green within the **referral site** on the map at [Appendix A](#).

Plan(s) means any of the documents required to be prepared, approved by the **Minister**, and/or implemented by the approval holder and published on the **website** in accordance with these conditions (includes action management plans and/or strategies).

Protected matter(s) means a matter protected under a controlling provision in Part 3 of the **EPBC Act** for which this approval has effect.

Recovery plans means a recovery plan made or adopted by the **Minister** under the **EPBC Act**.

Referral site means the area designated as 'Referral Site' and bounded by the solid black line on the map at [Appendix A](#).

Sensitive ecological data means data as defined in the Australian Government Department of the Environment (2016) *Sensitive Ecological Data – Access and Management Policy V1.0*.

Shapefiles means location and attribute information of the action provided in an Esri shapefile format. Shapefiles must contain '.shp', '.shx', '.dbf' files and a '.prj' file that specifies the projection/geographic coordinate system used. Shapefiles must also include an '.xml' metadata file that describes the shapefile for discovery and identification purposes.

Stage 1 means any activity associated with the action that is approved to occur within the **stage 1 site**, specifically **construction** and **clearing** works required for the development of a new State Primary School.

Stage 1 site means the area designated as 'Stage 1 Site' within the yellow shading and bounded by the solid yellow line on the map at [Appendix A](#).

Stage 2 means any activity associated with the action that is approved to occur within the **stage 2 site**, including **construction** and **clearing** works.

Stage 2 site means the area designated as 'Stage 2 Site' within the light green shading and bounded by the solid green line on the map at [Appendix A](#).

Suitably qualified person means a person who has professional qualifications, training, skills and/or experience related to the nominated subject matter and can give authoritative independent assessment, advice and analysis on performance relative to the subject matter using the relevant protocols, standards, methods and/or literature.

Threat abatement plan means a threat abatement plan made or adopted by the **Minister** under the **EPBC Act**.

Website means a set of related web pages located under a single domain name attributed to the approval holder and available to the public.

APPENDIX A - Map of Impact Area, Stage 1 & Stage 2 of the Action

ATTACHMENT 2 - EPBC Clearing Stages

Notes:
 This plan was prepared as a desktop assessment tool. The information on this plan is not suitable for any other purpose. Property dimensions, areas, numbers of lots and contours and other physical features shown have been compiled from existing information and may not have been verified by field survey. These may need verification if the development application is approved and development proceeds, and may change when a full survey is undertaken or in order to comply with development approval conditions. No reliance should be placed on the information on this plan for detailed design or for any financial dealings involving the land. Saunders Havill Group therefore disclaims any liability for any loss or damage whatsoever or howsoever incurred, arising from any party using or relying upon this plan for any purpose other than as a document prepared for the sole purpose of accompanying a development application and which may be subject to alteration beyond the control of the Saunders Havill Group. Unless a development approval states otherwise, this is not an approved plan.

Offset Strategy Approval Letter (Department of Agriculture, Water and the Environment)

Australian Government

Department of Agriculture, Water and the Environment

Mr Mark Clancy
Development Manager
Mirvac Queensland Pty Limited
PO Box 10047
BRISBANE QLD 4000

Dear Mr Clancy

Mirvac Greater Flagstone Project, Greenbank, Queensland Offset Strategy (EPBC2016/7817)

Thank you for submitting the *Offset Strategy - Mirvac Greater Flagstone Project, Greenbank, Queensland dated 23 September 2020* (Offset Strategy) for approval in accordance with conditions 4 - 6 of the EPBC 2016/7817 approval under the *Environment Protection and Biodiversity Conservation Act 1999* (EPBC Act). This is to advise you of my decision on the the Offset Strategy.

As a delegate of the Minister for the Environment, I have decided to approve the Offset Strategy, as it meets the requirements of approval conditions 4 to 6 of EPBC 2016/7817. The approved Offset Strategy must now be implemented.

Please note that Mirvac Queensland Pty Limited is required to keep accurate records substantiating all activities associated with the implementation of the Offset Strategy, and is to make those records available to the Department at the Minister's request.

If Mirvac Queensland Pty Limited wish to implement actions otherwise than in accordance with the approved Offset Strategy, Mirvac Queensland Pty Limited must submit a revised Offset Strategy for approval by the Minister.

Should you require any further information please contact Ben Edwards, by email to ben.edwards@environment.gov.au or postapproval@awe.gov.au, and quote the EPBC reference number shown at the beginning of this letter.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Richard Miles'.

Vegetation Clearing and Fauna Management Plan - Notes

INTRODUCTION

The Environmental Management Division of the Saunders Havill Group (SHG) was engaged by MIRVAC Ltd to prepare a Vegetation Management Plan (VMP) for ROL6.1, a section of ROL 6 located in the Everleigh Project.

The purpose of this plan is to manage the vegetation removal process within the clearing area. The clearing area of ROL 6 retains the Phased School Site vegetation clearing approval over the majority of its area. This VCFMP is intended to support the development application to EDQ for ROL 6. The clearing works will follow general principles for vegetation clearing documented on this sheet and all EDQ specific requirements. This VCFMP has been produced by overlaying the following site datasets to determine impacts and disturbance on existing vegetation:

1. GPS/survey accurate tree data including specimen details & features (SHG,2018-2020)
2. Site Inspection of Existing Habitat features (SHG, 2020)
3. ROL 6 Layout Plans (URBIS, 2020)
4. ROL 6 civil design plans (Premise, 2020)
5. Arborist inspection (TBC)

PROJECT MANAGEMENT

Vegetation management and its processes are an integral part of the construction and operational works phases. The site supervisor is responsible for all onsite works including overseeing vegetation clearing, health and safety of fauna and adhering to EDQ's conditions and guidelines, as well as the Australian Standards - Protection of Trees on Development Sites AS4970-2009 and Pruning of Amenity Trees AS4373-1996.

The project arborist (with minimum AQF Level 5 in Arboriculture and minimum 5 years' experience) is responsible for: undertaking all appropriate arboricultural measures prior to the commencement of any earthworks on site to ensure the survival and long-term health of existing trees to be retained. These measures may include soil decompaction, soil aeration, fertilising, mulching, watering, root or crown reduction and hazard reduction or as otherwise determined by the arborist. The site arborist is also required to direct and supervise all works within TPZs of trees to be retained, and perform arboricultural care requirements where necessary.

The roles and responsibilities of the Fauna Spotter-catcher are provided on Sheet 3.

SITE CONTACTS

Site and consulting contacts for queries relating to vegetation clearing include:

Client Contact: MIRVAC Ltd Mr Jason Augustine Ph (07) 3959 5960	Environmental Contact: Saunders Havill Group Dr Andrew Davies Ph (07) 3251 9444
--	--

Site Contractor: To be advised	Site Arborist: To be advised
-----------------------------------	---------------------------------

Site Fauna spotter-catcher: To be advised (Refer to Fauna Management Plan)	Site Bushfire Consultant: To be advised
--	--

CLEARING PHASES AND PROCESS

PHASE 1 - Tree Protection Fencing to be installed

Fencing to be installed prior to the commencement of any clearing works on the site. Tree protection fencing to be located at or beyond 12 x diameter at breast height (DBH) (AS4970-2009 Protection of trees on development sites)—unless approved by the appointed arborist.

PHASE 2 - Fauna Inspections and Management

Undertake necessary fauna management requirements prior to clearing works - as a minimum, this should include the specifications listed on sheet 3, and a pre-clearance report provided to the Environment Coordinator and Site Supervisor.

PHASE 3 - Pre-start Meeting

Fencing shall be in place at the time of the pre-start meeting for inspection and sign off by the Environment Coordinator and Site Supervisor.

PHASE 4 - Undertake Bulk Clearing

Undertake wholesale removal of vegetation once all necessary pre-works checks have been provided. Clearing will occur in the direction outlined in sheet 67 of this VCFMP, and managed by the appointed fauna spotter-catcher to allow all fauna unimpeded movement south towards the currently retained vegetation over future stages.

Vegetation clearing techniques:

- By utilising the most appropriate machinery and equipment during vegetation clearing, the probability of injury or death of wildlife during clearing can be significantly reduced or eliminated while still maintaining an efficient vegetation removal process.
- Suggested techniques are as follows: (a) a vertical tree grab attachment on an excavator (30 tonne) can be used to pull entire trees in size up to 30-40cm diameter at a height measured at 1.3 metres above ground level and lay them down in a steady controlled fashion, allowing inspection by a fauna spotter-catcher (b) where large trees are too large for a vertical tree grab and have been identified, an elevated work platform or where practical, cherry picker should be used in conjunction with a chainsaw operator and fauna spotter-catcher. Alternatively, careful removal of hollow section from habitat tree and gentle lowering for inspection by fauna spotter-catcher (c) the use of bulldozers to clear vegetation is limited to vegetation that has been thoroughly inspected by a fauna spotter-catcher and is found to contain no fauna or potential habitat. Bulldozers are not to be used to push over large trees that contain hollows or other habitat features.

NOTE: Dogs are not permitted onsite at all times during construction. Construction works including clearing must occur between the hours of 6.30am and 6.30pm.

ACCESS AND STOCKPILING

A vegetation stockpiling location is to be designated in an easily accessible area outside of TPZs. An indicative vegetation stockpiling location has been allocated adjacent to the waterway corridor, allowing for material to be easily utilised for future rehabilitation works. This location is subject to minor change according to cut/fill activities and intended location for reuse.

Cleared vegetation free of weeds is to be reused on or off the project site. Recycling techniques include mulching, tub-grinding, wood chipping and salvage (e.g. custom milling). Trees with identified hollows should have the hollow section preserved and should be suitably mounted on nearby or adjacent suitable trees.

MAINTENANCE

After tree clearing works on site, an analysis of the vegetation's health and growth should be undertaken by the project arborist to determine specific maintenance needs. Follow up maintenance works should be carried out on retained vegetation where required.

Tree Protection Zone - Detail (not to scale)

Tree Protection Fencing - Detail (not to scale)

Vegetation Clearing and Fauna Management Plan - Fauna Management Notes

INTRODUCTION

The Fauna Management specification on this VCFMP is designed to protect native animals and control/manage impacts during the vegetation clearing works. The clearing area occurs within ROL6.1, a section of the ROL 6 application area. Common species associated with semi-urban/urban/bushland landscapes were spotted at the clearing area during the ecological survey. Koalas have been spotted in and around the ROL 6 area in various ecological surveys. The fauna management specifications and principles incorporated in this VCFMP applies generically to all native animals and focuses on avoiding conflicts and incorporating measures to minimize disturbance. Compliance with this section of the VCFMP is compulsory and incorporates the use of expert consultants including a Fauna Spotter (holding a valid Wildlife Rehabilitation Permit issued by the **Department of Environment and Science**).

FAUNA IMPACTS

Clearing of vegetation provides an obvious source of impact to existing habitat and animal safety. More specifically the existing vegetation provides habitat, movement and protection opportunities for some fauna through both regrowth and canopy trees. These opportunities are to be altered during and post vegetation clearing works.

CONSTRUCTION IMPACTS

- Direct removal of site vegetation
- Loss of habitat
- Noise, vibration and dust
- Erosion and sedimentation
- Threats associated with open cuts etc. and fauna entrapment
- Loss of food sources
- Excavation/compaction/changes in ground levels
- Altering hydrological flows
- Fragmentation of habitat

OPERATIONAL IMPACTS

- Weed introduction (garden escapees)
- Increased hydrology with increased hardstand
- Altering of run-off chemical and nutrient components (quality)
- Barriers to fauna movement
- Vehicles and pedestrian movement and trespass
- Introduction of domestic and predatory species

Fauna Management Schedule

1.0 PRE CLEARING				
Ref:	Management Item	Responsibility	Timing	Reporting
1.1	TEMPORARY FENCING Prior to the commencement of works and to be inspected by the site Environmental Coordinator—Delineate areas where vegetation is proposed to be retained with exclusion fencing to prevent accidental felling. Clearing is to be undertaken in accordance with AS 4970-2009 Protection of Trees on Development Sites. <ul style="list-style-type: none"> ▪ Fencing shall be fauna friendly ▪ No clearing, stockpiling, site access, earthworks, storage, etc. is to occur within the temporary protection fencing. ▪ Only approved weed management works to occur within the temporary protection fencing ▪ Fencing to be reinstated immediately if damaged or knocked down, any damage to retained trees to be immediately reported to Project Arborist. ▪ Fencing to remain until the completion of all site works. 	SITE SUPERVISOR	Prior to the commencement of clearing	Inspected by Environmental Coordinator
1.2	CONTRACTOR EDUCATION & AWARENESS All site contractors and subcontractors will be made aware of their responsibilities to protect native fauna. The Fauna Management notes on this VCFMP is provided as a working document to assist on-site management and protection of native animals. This generally will form part of education and training on a broader work place health and safety but as a minimum will include: <ul style="list-style-type: none"> ▪ Copy of VCFMP kept on-site (Site Office). ▪ General education and awareness notification of contractors and sub-contractors involved in activities potentially impacting native animals as part of site induction – contractors must know the location of the VCFMP, key phone numbers and who to report to if they breach the VCFMP. A list of relevant contact phone numbers as listed on these drawings is kept in a visible and accessible location in the site office.	SITE SUPERVISOR / THE PROPONENT	Prior to the commencement of clearing and as part of the site induction for new staff and sub-contractors	SITE SUPERVISOR
2.0 VEGETATION CLEARING				
2.1	SPOTTER / RELOCATOR Immediately prior to the commencement of clearing of native vegetation a daily visual inspection of the area must be carried out by the fauna spotter-catcher. Furthermore, the fauna spotter-catcher is to be present on site during all clearing operations to supervise and direct clearing works, and to respond to any situations that may arise in relation to fauna. In the event of an animal being located, a suitable buffer area (as determined by the fauna spotter-catcher) should be established around the animal's location that excludes machinery until it has relocated at its own accord (usually overnight). If an animal requires relocating this must be undertaken by a suitable qualified fauna expert recognized by the Department of Environment & Science . For some fauna, specific permit requirements may apply. If vegetation is left stockpiled for more than 24 hours or overnight, the fauna spotter-catcher must inspect the vegetation prior to chipping or removal from site. The Fauna Spotter-catcher will manage the care of any injured or orphaned wildlife (e.g. veterinary attention or delivery to a wildlife carer). Any native fauna listed as a threatened species under the Nature Conservation (Wildlife) Regulation 2006 that are injured or orphaned by the development process, must be reported to the Department of Environment & Science (1300 130 372). Any other injured or orphaned fauna must be reported through the Rehabilitation Permit return process by the Fauna Spotter-catcher. The Site Supervisor is responsible for the safe management of site fauna and implementation of these specific fauna requirements.	SITE SUPERVISOR	Prior to the commencement, and during clearing	Inspected by the Fauna Spotter-catcher
2.2	SPECIFIC KOALA MANAGEMENT NOTES A Koala Spotter is a person who holds a tertiary qualification in Biology or Zoology, or who is demonstrably experienced in the identification and location of Koalas in their natural habitat. For example, a koala keeper employed by a licensed Wildlife exhibitor (i.e. a zoo) may be capable of demonstrating competence in locating Koala's. Prior to the commencement and during felling operations, it is the responsibility of the Koala spotter to be present at the site of felling operations identify any tree at the site within which a Koala is present, as well as any tree that has a crown which is intermeshed or overlapping with such a tree; and advise the person who is authorised to conduct the felling operation, or that persons' representative, of the precise location of each such tree Management Item.	SITE SUPERVISOR	Prior to the commencement, and during clearing	Inspected by the Fauna Spotter-catcher
2.3	CLEARING PATTERN / FAUNA FLUSHING Clearing occurs once the fauna spotter-catcher gives sign off the site is clear of all native species and all necessary permits are obtained. The intended clearing directions is out from existing cleared areas towards currently retained vegetation. Clearing direction is subject to amendment by the fauna spotter-catcher. At the completion of operational works, the fauna spotter-catcher must provide certification to the environmental coordinator that all works were undertaken in accordance with these fauna management requirements.	SITE SUPERVISOR	Prior to the commencement, and during clearing	Inspected by the Fauna Spotter-catcher

- ROL6 bushfire management vegetation clearing area
- ROL6.1 boundary
- Tree protection fencing
- Clearing direction
- ⊗ Vegetation stockpile location (indicative)

Vegetation Clearing & Fauna Management Plan - Clearing Direction

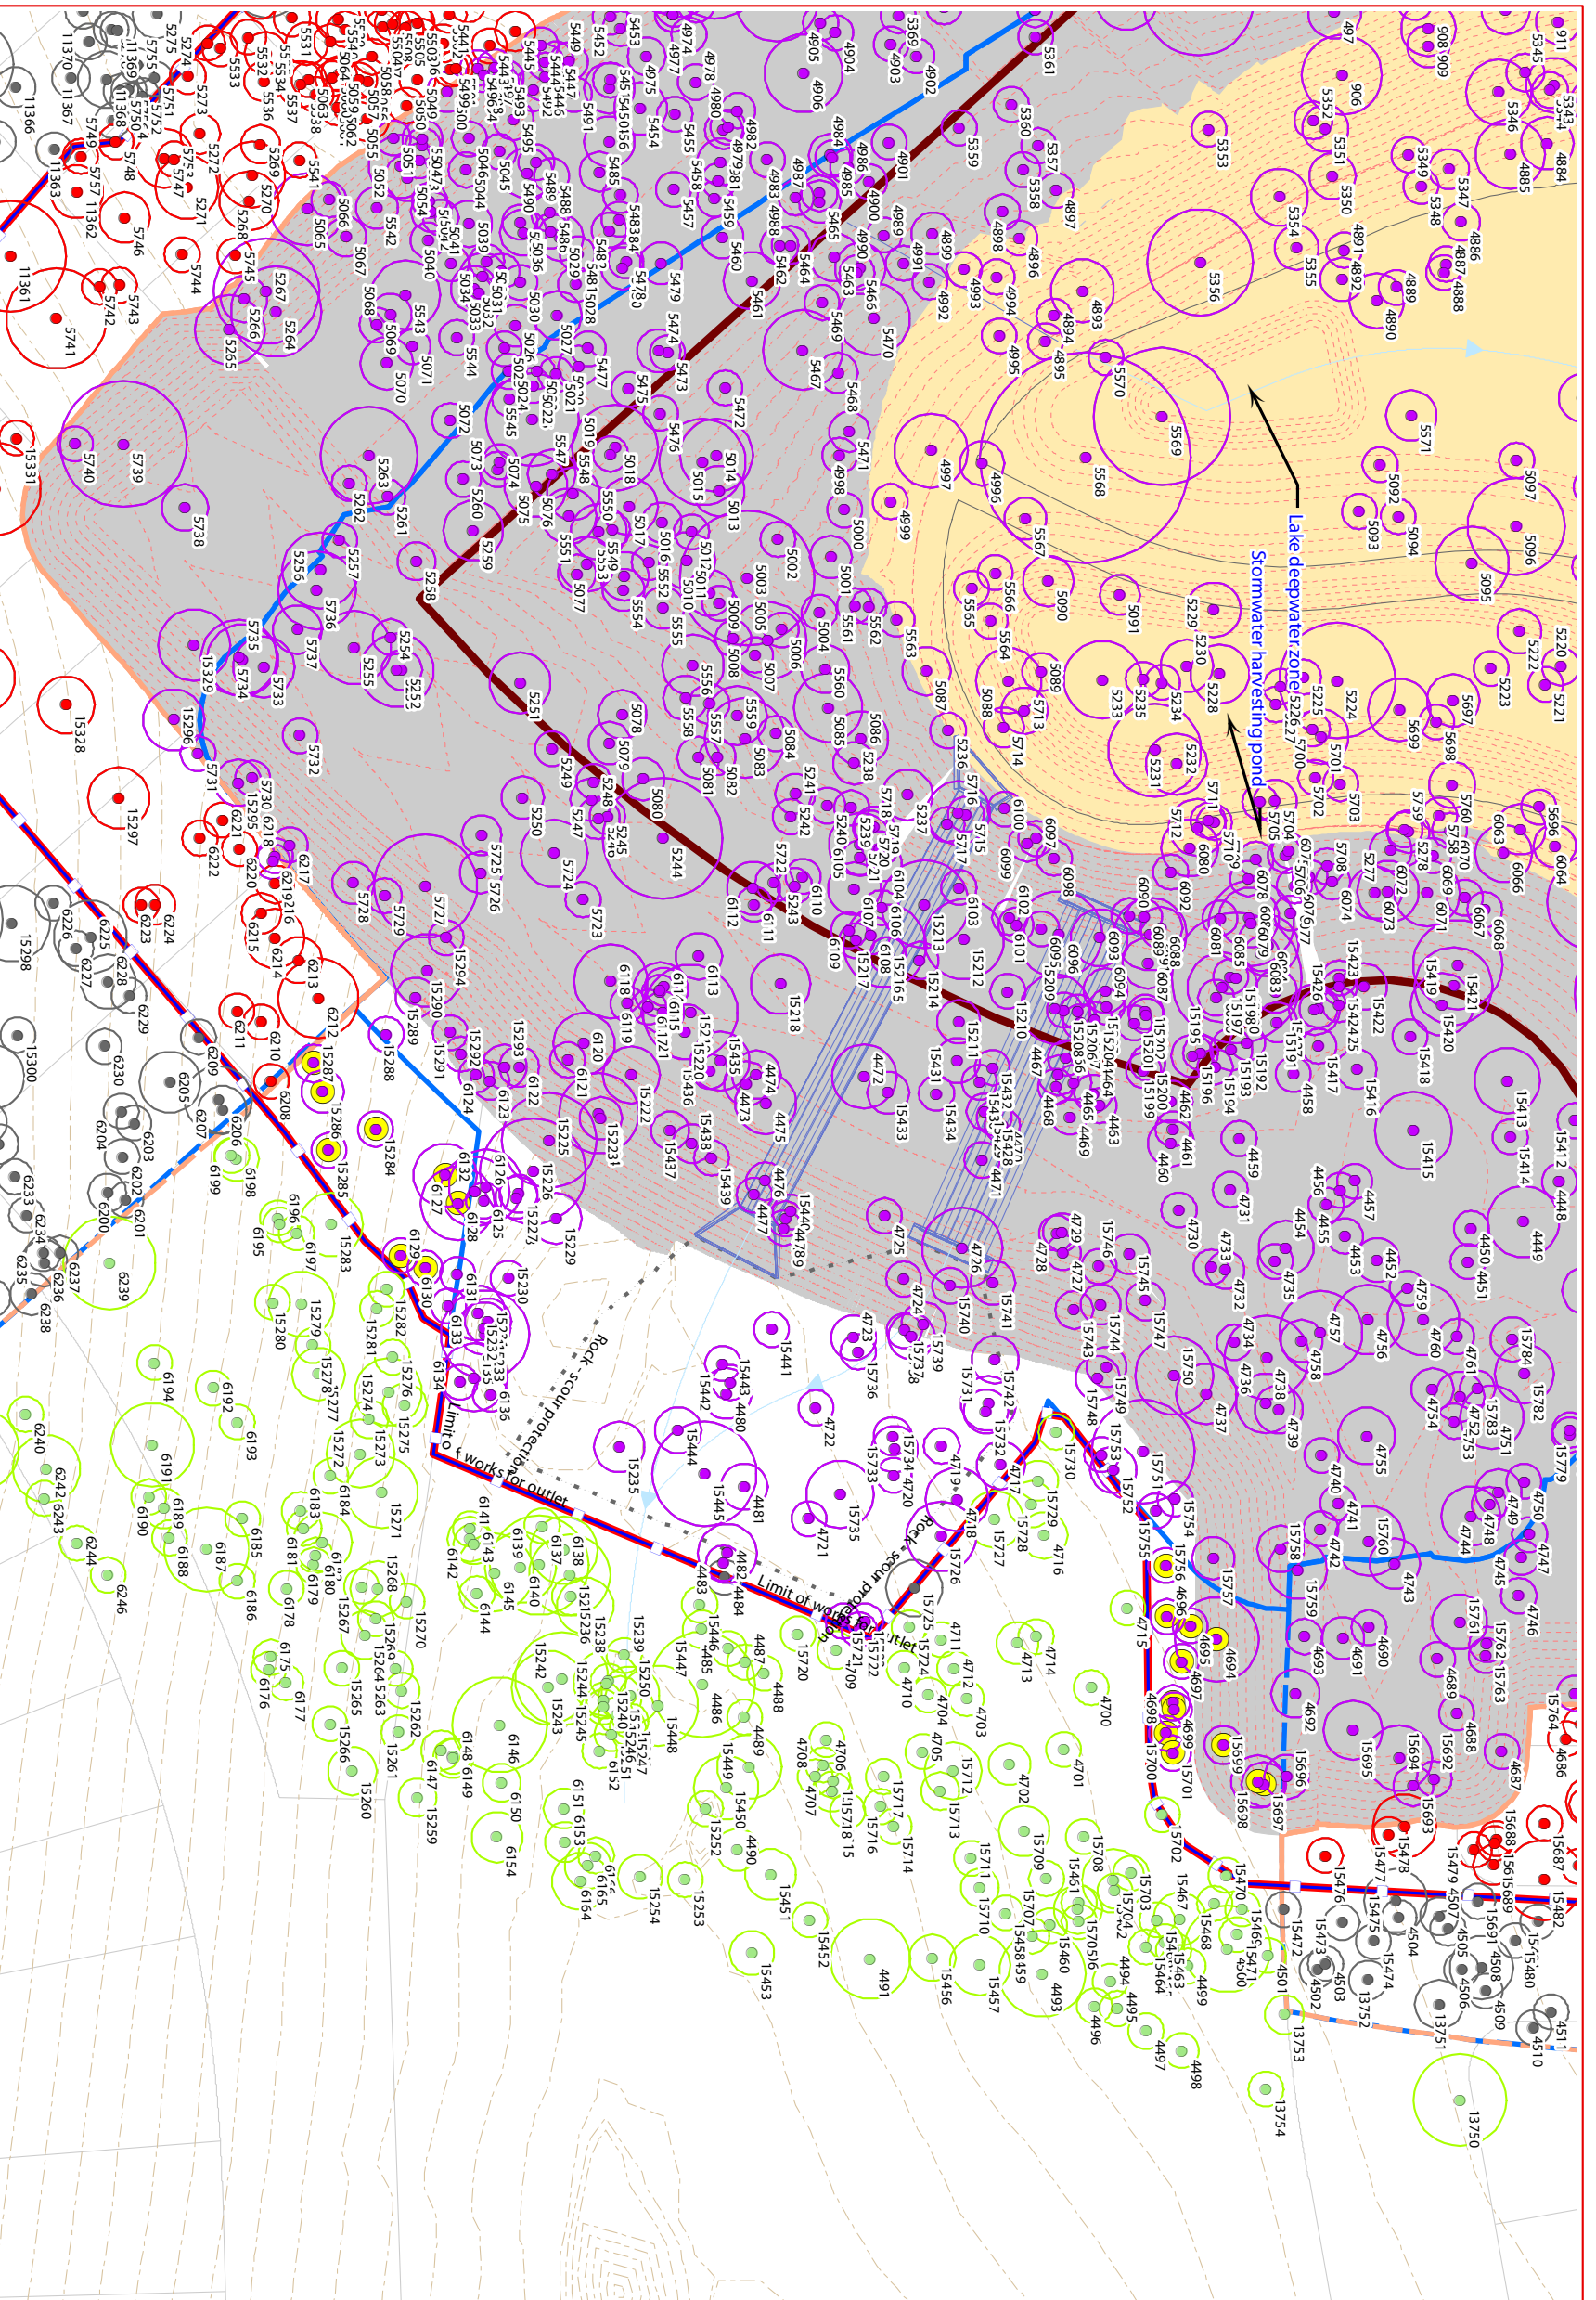

DISCLAIMER:
 THESE PLANS HAVE BEEN PREPARED BY THE ENGINEER FOR THE CLIENT SAUNDERS HAVILL GROUP. THE ENGINEER HAS NOT CONDUCTED ANY VISUAL CHECKS OF THE SITE OR THE EXISTING CONDITIONS. THE CLIENT IS RESPONSIBLE FOR OBTAINING ALL NECESSARY PERMITS AND APPROVALS FROM THE RELEVANT AUTHORITIES. THE ENGINEER'S LIABILITY IS LIMITED TO THE SERVICES PROVIDED AND DOES NOT EXTEND TO ANY OTHER MATTERS. THE CLIENT ACCEPTS THAT THE USE OF THESE PLANS IS AT THEIR OWN RISK AND THAT THE ENGINEER WILL NOT BE RESPONSIBLE FOR ANY CONSEQUENCES ARISING FROM THE USE OF THESE PLANS.

PLAN OF	Vegetation Clearing & Fauna Management Plan
DATE	19/07/2021
CLIENT REF.	7598
DRAWING No.:	7598 E 28 ROL6.1 VCFMP A

- GPS Tree plot**
- Tree to remove in ROL6-1 works extent
 - Tree to remove in ROL6-1 bushfire management area already approved for removal in State School application
 - Adjacent tree to remove during ROL6/State School works
 - Adjacent tree to retain during ROL6 works
 - Previously Retained Tree to be Removed
 - Previous ROL6 bush fire management vegetation clearing area
 - Previous ROL6 civil works
 - Everleigh master plan design (outside of ROL6 application)
 - ROL6 bushfire management vegetation clearing area
 - Project stage boundaries
 - ROL6 Layout & civil design
 - Sports field layout design
 - ROL6 services design (sewer)
 - ROL6 services design (water)
 - ROL6 services design
 - ROL6 Boundary
 - ROL6 civil works vegetation clearing area
 - ROL6 Design contours
 - ROL6.1 Boundary
 - Tree protection fencing
 - Cut area
 - Fill area

DES NCA Permit & Impact Management Plan

Permit

Section 15 of Nature Conservation (Administration) Regulation 2006

Protected Plant Clearing Permit

This wildlife authority is issued under the following legislation: Nature Conservation (Administration) Regulation 2017 Part 2 Division 1.

Permit number: WA0026119 **Valid from:** 23 August 2020 to 22 August 2022

Activity: Clearing endangered, vulnerable or near threatened plants

Role	Name	Registered address
Principal Holder:	Saunders Havill Group Pty Ltd	9 Thompson St BOWEN HILLS QLD 4006 Australia
Person In Charge:	Mark Clancy	
Business name:		ABN/ACN 144972949
Activity location/licensed premises	LOT 9001/SP300875 LOT 9002/SP317644 LOT 9003/SP317644	

Schedule

Family or Species or Schedule	Details	Category	Quantity	Unit
Species	bush house or weeping paperbark or swamp teatree, Melaleuca ibyana	Live	277	Hectares

Adam Northam
Department of Environment and Science
Delegate of the administering authority
Nature Conservation Act 1992

Date issued: 20 August 2020

Enquiries:
Wildlife Assessment Team
Email: wildlife@des.qld.gov.au
Postal Address: PO Box 102, Toowoomba, QLD, 4350

Legislative Requirements and Conditions

Legislative Requirements

- PPCLR06 Where monitoring by the permit holder of impact management actions with respect to endangered, vulnerable or near threatened species in the clearing area identifies that those actions appear to be unsuccessful or failing, the permittee must notify DES immediately in order to discuss the significant residual impact of the clearing and furthermore discuss any potential implementation of an offset action in accordance with the Queensland Environmental Offset Policy.
This requirement may be found in Section 284(1) Of the Nature Conservation (Wildlife Management) Regulation 2006
- PPCLR01 This permit does not exempt the permit holder from obtaining other approvals relevant to the harvest of whole protected plants at the site.
- PPCLR02 Activities carried out under this authority, unless otherwise authorised, apply to non-protected areas only.
This requirement may be found in section 15 of the Nature Conservation (Administration) Regulation 2017
- PPCLR03 This permit includes the clearing of least concern protected plants within the clearing area.

Conditions

- PPCM01 Activities relating to the impact of EVNT plant species under this permit must be in accordance with the procedures and actions outlined in the following documents, except where conditions below indicate otherwise:
- 'Impact Management Plan *Melaleuca irbyana* renewal for permit No. WA0009354 432-520 Greenback Road, Greenbank Prepared for Mirvac Queensland Pty Ltd 10 July 2020 Job No. 7598', associated appendices and any other supporting documentation submitted to the department in relation to application number APP0057006.
- PPCM02 The permit holder is to notify DES in writing at least 48 hours in advance of clearing commencing, for example, via an email to wildlife@des.qld.gov.au
- PPCM04 Should the project not proceed, in addition to the requirement to rehabilitate the area/s once cleared, the site/s must not be further disturbed and must be maintained to ensure erosion and weed control.
- PPCM08 It is the permit holder's responsibility to ensure that the proposed rehabilitation area with EVNT species *Melaleuca irbyana* is and remains legally secured.
- PPCM09 Rehabilitation and/or translocation reporting must be maintained from the commencement date of clearing and continue for a minimum period of 24 months.

The written report (including advice on each monitoring period) must be lodged with the department via an email to wildlife@des.qld.gov.au within 10 business days after each annual period.
