

Mirvac's Greenbank development Schools fact sheet

- The State Government will monitor the growth in the Greater Flagstone Priority Development Area (PDA) and surrounding area and roll-out schools and other infrastructure to service the growing population.
- Under the Greater Flagstone PDA, the State Government has planned a number of State primary and secondary schools to cater for the forecast growth in population, including the State primary school proposed within Everleigh, and the planned State high school located approximately 4km to the south-west of Mirvac's site.
- Developers including Mirvac are required to provide serviced sites for the identified school within timeframes set under the relevant approvals, with the built form designed and delivered by the State Government.
- The State primary school proposed within Mirvac's masterplan is intended to cater for about 800 to 1,000 students. Under Mirvac's development approval, the serviced site is to be provided prior to Mirvac's 560th residential lot or earlier if requested by the State. Mirvac will continue working with the State to facilitate the opening of the school as early as possible.
- Existing and planned schools within the catchment include:

Existing Primary Schools

- State
 - Greenbank State School – 4km to the north-west
 - Boronia State School – 8km to the north
